

ScanNCut Instructions

KISS-CUTTING STICKERS

- Print stickers onto an A4 sticker sheet
- Place sticker sheet onto a 12" x 12" standard mat
- Adjust the ScanNCut blade to the required level for kiss cutting stickers. (You may need to test the level of the blade on a blank sticker sheet)
- Feed mat into ScanNCut

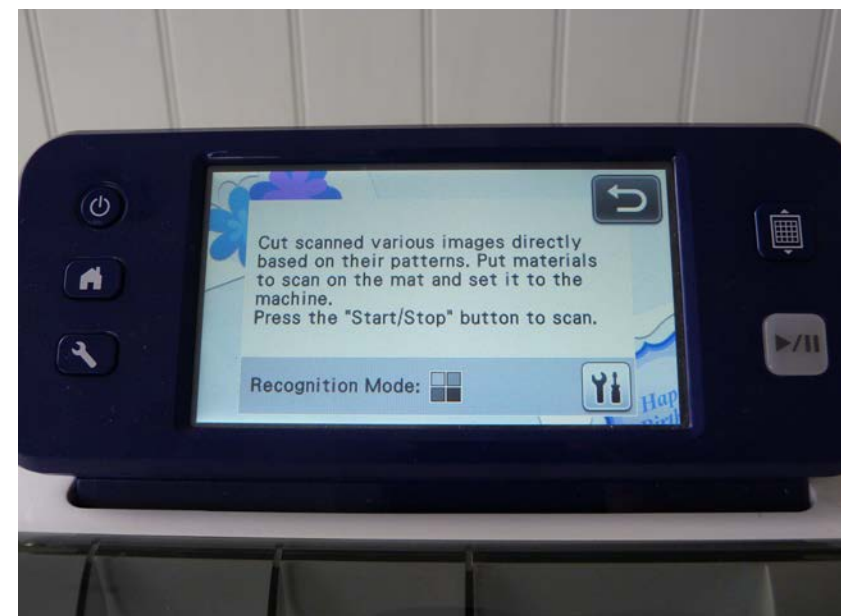

- Select **'Scan'**

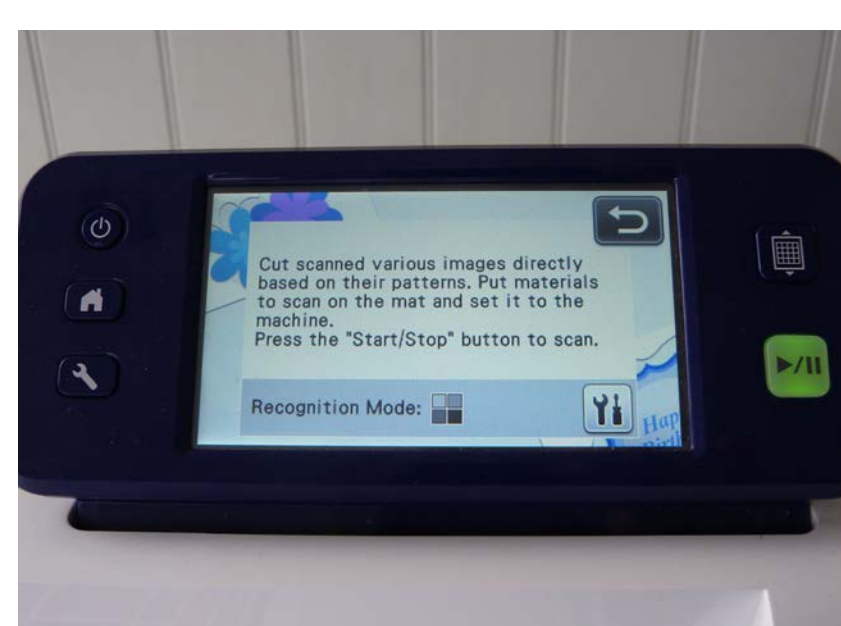

- Select **'Direct Cut'**

- Select Device as **'ScanNCut Machine'**

- Ensure Recognition Mode is set to **'Grey Scale'**. Change if set to full colour.

- Press **'Start/Stop'** button

- Sticker Sheet will scan

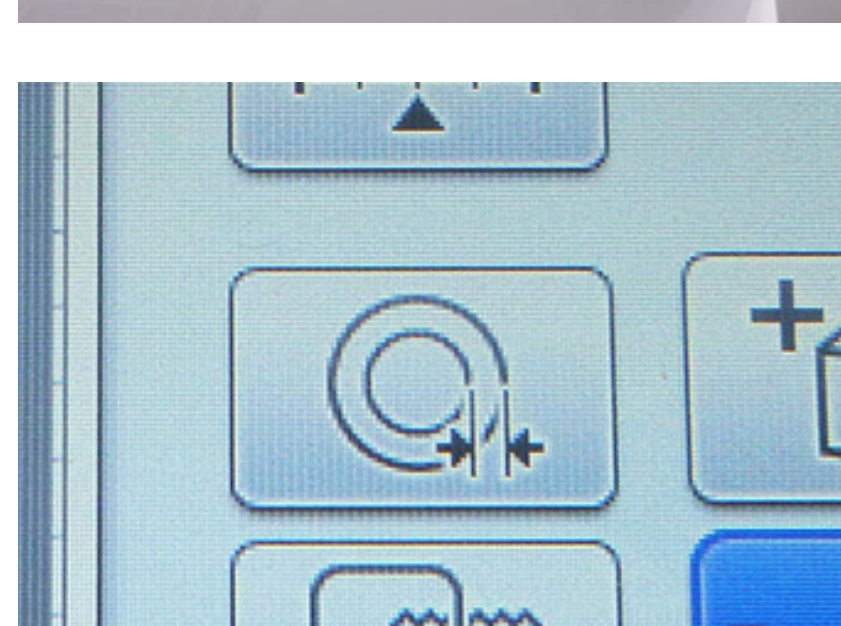

- Once scanned will show image on screen
- Click **'OK'**

- Adjust the scanned area to the sticker sheet size by dragging red arrows on screen

- This allows the scan and cut to concentrate on the stickers and not the remainder of the scanned area

- Select the **'Outline Distance'** button

- Adjust the Outline Distance to -0.50 (press the - twice)
- Click **'OK'**

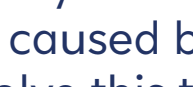

- Click **'OK'**

- Select **'Cut'**

- Press **'Start/Stop'** button

- You may notice that your Scan N Cut machine does not capture the lines to each and every file despite your best efforts. This is caused by the scanner not picking up on the dark lines in your stickers. To resolve this try rescanning and altering the contrast by clicking on the  button.
